

Student thesis/internship/job in the field of surgical navigation (w/m/d)

Who we are:

ATLAS medical technologies GmbH is a young company that develops and distributes navigation systems for physicians for use in interventional radiology and orthopedic applications since 2018. Like navigation on a cell phone, our system enables simple guidance tailored precisely to the surgical intervention.

We are a dynamic, international company, based in Bochum, Germany. We would like to share our enthusiasm for future-oriented and market-driven solutions with you. With us, you can contribute your knowledge and continuously develop yourself personally. We are a team of highly qualified experts who take on responsible challenges.

What we are looking for:

As part of our promotion in education and training for graduates, we are looking for dedicated students for a period of 6 to 12 months for our upcoming project at our headquarters in Bochum. Key areas of activity include industrial engineering, mechanical engineering, electrical engineering, measurement technology, materials engineering, corporate management, market research, etc.

We look forward to your informative initial application:
