

For the position as Technical Manager in our office in Shenzhen, China we are looking for a technical product engineer. After a two years training on the job in our mill Schmiedewerke Gröditz, nearby Dresden, you will take over the responsibility for the technical customer support in China and the daily communication between the Shenzhen office, the mill in Gröditz and our sales office in Willich (near Düsseldorf).

TECHNICAL PRODUCT ENGINEER (m/f/d)

JOB RESPONSIBILITIES

- Assisting sales staff to provide technical pre- & after-sales-service / product promotion.
- Provide technical solutions to the problems encountered by customers by processing our material in daily business.
- Translate technical documents.
- Providing feedback of the customer's technical opinions between China and the German HQ.
- Support the team with claim management.

Gröditzer Vertriebsgesellschaft mbH is a sales organization for forging products of the companies Schmiedewerke Gröditz GmbH and Gröditzer Werkzeugstahl Burg GmbH, which belongs to BU GMH Schmiedetechnik GmbH, the forging division of the GMH GRUPPE.

JOB REQUIREMENTS

- Bachelor or Master degree in material science, preferable major in metallurgy or metals technology, process and metallurgical engineering.
- Experience in heat treatment technology, mold making (plastic mold / die casting) or related industries is appreciated. Material failure analysis experience is preferred.
- Profound English skills (CET-6 or above) and familiarity with the expert terms of the industry is a must. Daily fluent communication in English and Chinese will be required in spoken and written language.
- Ready to travel to China.

An extremely flexible range of services is available to customers in many industries. In addition to tool and mold making, the large-scale engine, the power plant construction, the automotive industry and general mechanical engineering belong to our regular customer base.

Do you have the desire to work on practical solutions for our customers and you want to actively participate in the achievement of our goals in a dedicated team?
Please send us your complete and informative application documents:
