

ABB Discovery Trainee @ Product Marketing / Business Development / Product Management Medium Voltage

Take your next career step at ABB with a global team that is energizing the transformation of society and industry to achieve a more productive, sustainable future.

At ABB, we have the clear goal of driving diversity and inclusion across all dimensions: gender, LGBTQ+, abilities, ethnicity and generations. Together, we are embarking on a journey where each and every one of us, individually and collectively, welcomes and celebrates individual differences.

Are you ready for new adventures and motivated to experience real projects driving performance to new levels and supporting a more productive and sustainable future? Are you looking for a unique entry opportunity with interesting roles and a highly motivated team supported by open communication structures? Then our ABB Discovery Program is the right fit for you!

Based on a personal, practice-oriented introduction program, you will be given the opportunity to acquire the confidence needed to work independently as well as to be a constructive member of inclusive teams within your assigned area. With the aim to assist you in attaining your career goals, ABB provides a wealth of personalized development opportunities, with targeted training measures helping you to enhance your skills on a continuous basis. Constant exposure to various parts of ABB and individuals within the company provides the foundation for an accelerated career path.

Start date of the program is October 1, 2022.

During the 18-month trainee program you will go through three stations at home and abroad: You start in your target area Control & Protection Products and get to know a wide range of medium voltage components such as vacuum interrupters or embedded poles, the core components of the world wide energy distribution. In the next station you have the opportunity to gain further experience in product management and help to shape the portfolio of the future. You can gain intercultural experience in a six-month stay abroad at one of our international locations, e.g. in North America, North or South Asia, Europe or the Middle East.

Your responsibilities

Experience the operations of an international company firsthand during three six months assignments over the course of 18 months.

Discover your interests and different functions/roles through challenging and impactful assignments where you are fully integrated into the team.

Profit from individually targeted possibilities for training and development, professional mentoring, exposure to executives, and support from the Discovery Program team.

Actively contribute to diverse social events and team activities and use the chance to establish a broad (global) network within ABB.

Develop your strengths with the help of regular feedback on your performance objectives.

Be part of the local and global ABB Discovery trainee community!

Development and use of marketing tools; Product training as well as presentation and promotion of the product portfolio

Cooperation with product management in the new and further development of the existing portfolio as well as support in the market launch process for products

Your background

Successfully completed master's degree in electrical engineering or industrial engineering with a focus on energy technology

Ideally internships / working student activities in a sales-related position, such as product marketing, project management, sales or product management

First international experience as part of an internship / semester abroad is an advantage

Clear hands-on mentality with the self-image of tackling and implementing topics

Personally, you are a team player and convince with commitment, communications skills and customer orientation

Enjoy working in an international environment as well as intercultural exchange with colleagues

Fluent written and spoken German and English, ideally you have a command of another foreign language, e.g. Spanish

Flexibility and mobility on an international level

More about us

We look forward to receiving your application (documents submitted in English are appreciated). If you want to discover more about ABB, take another look at our website www.abb.com.

#LI-Hybrid

ABB is able to offer you an interesting role within a highly motivated team, together with open communication structures. On the basis of a personal, practice-oriented induction programme, you will be given the opportunity to acquire the confidence needed to work independently and self-reliantly within your assigned area. Even after the joining phase, ABB offers a wide range of individual career development opportunities and supports you in realising your career goals with targeted training measures. At ABB you will find an attractive working environment in all phases of life - including policies for sabbaticals and home office, the ABB children's vacation camp and taking care of family members.

Interested in joining our team? We are looking forward to receiving your complete application through our online tool.
